"Sister Sister"

Visit "[Sister Sister](#)" on MotoLyrics.com

I wanna sigh by the tide
Thinking down over my tired tired life
Like a pigeon from the nest
The test
Its moonlight likes to lie
As a child to his mother
His brother
It's just time alright
And in time so they say
Sister sister
All on fire

So this is what they say
So this is what they say
So this is what they say
So this is what they say

I'm watching over my mind
I'm watching over my mind
I'm watching over my mind

I've only tried, over right?
And my knees
Just another day
So brother can you spare
A lending ear
To be free from this sight
Pigeon from the nest
The test
It's just my world
So the girl and boy
And the part
What will we ever say

So this is what they say
So this is what they say
So this is what they say
So this is what they say

I'm watching over my mind
I'm watching over my mind

I'm watching over my mind

We all just feel like feeling
In a world, in a world, sister

So brother can you spare
Just one moment of your life
And my ears are growing near
The tears are streaming down your face
Is this all we have to say
Is this all we have to say
Brother mother sister sister
It's all we have

So this is what they say
So this is what they say
So this is what they say
So this is what they say
So this is what they say
So this is what they say
So this is what they say
So this is what they say
So this is what they say
So this is what they say
So this is what they say
So this is what they say
