You were right
I was battling you
Trying to prove myself
I tried to bury you with guilt
I wanted to bring you down
I got nothing better to do
Than pay too much attention to you
It's sad but it's not your fault

Selfrighteous fool
I guess I lost that cool
Tapping till I drive you insane
Selfrighteous, never right
Setting back, so uptight
To tolerate me
The sphere I bring

Why, I was obsessed to bring you down
Watching your every move
Playing a little boy game
Always had something to prove
Waiting to cut you down
Making it hard to move
With only one thing to do
Tell me first to make it easy

Now you will be free
Now nothing depends on me
Tapping till I drive you insane

Now you will be free
No sick people to
I figure it has that warm
I thought I would never go
I thought I would never go

Freed pig
