Last night
I fell in love with you
We threw the rice
And as it fell from the roof
I realized, what the hell did I just do
I let down the wall
Oh my God, for once, I think I saw the devil talk
Through the fog
But then I remembered

They don't wanna tell us, but
We've already found out
We've found the proof

They don't wanna tell us, but
We've already found out
We know the truth

We got the medicine
For our mind
We got the medicine
So live life

Living on high, never on low
I found a place where time has froze
Where you can fly on unicorns
What you imagine can take form

What you don't know can never hurt you
But if the eyes are closed how can you find the virtue
[x2]

They don't wanna tell us, but
We've already found out
We've found the proof

They don't wanna tell us, but
We've already found out
We know the truth

We got the medicine
For our mind

We got the medicine
So live life

We got the medicine
We got the medicine
For our mind
We got the medicine
We got the medicine
We know the truth

Last night
I fell in love with you
We threw the rice
And as it fell from the roof
I realized, what the hell did I just do
I let down the wall
Oh my God, for once, I think I saw the devil talk
Through the fog
But then I remembered

They donâ€™t wanna tell us, but
Weâ€™ve already found out
Weâ€™ve found the proof

They donâ€™t wanna tell us, but
Weâ€™ve already found out
We know the truth

We got the medicine
(We got the medicine)
For our mind
We got the medicine
So live life
(So live life)
We got the medicine
They donâ€™t wanna tell us, but
Weâ€™ve already found out
For our mind
We got the medicine
