I tried so many ways  
To free my heart from you  
I fear all was in vain  
Seduced by the unknown  
You changed so much inside  
A plague seized my soul  
I wait for you on the dusking day  
My spirit lies in sorrow  
The love survived but I'm still afraid  
Of the truth behind  
What happened to you?

[Chorus]

I will whisper to you  
Through birds and all the living creatures  
But you will never know  
That it's my voice what you hear  
I tried so many ways  
To free my heart from you  
I fear all was in vain...  
For you I'd stay away forever
