

Glory "Witness"

Visit "[Witness](#)" on MotoLyrics.com

The moon and stars will light the night
But not too bright
The ocean is too big to see
But so small in your eyes
So look around and know
We are all witnesses
This is what I've seen and what I've heard
And I know for sure
You are high above everything
You can do anything
We are we are all witnesses
We are all witnesses
We are we're all witnesses
So many broken hearts and lives
You have repaired
And we can't help but speak the things
That we have seen and heard
So look around and know
We are all witnesses
