Tonight's the night where we will find hope

The time has come to let the tide rip us from the shore
It's no one's fault, the tear from the warmth
We must find our way through this world
You will now feel afraid
In the war we will fight
And we must come out alive

[Chorus:]

Run out on us, so we throw it in your face
We've got to come out in single against the fray
We'll reside in the dirt alongside the dead
We'll do whatever it takes

We must come out alive
We must come out alive

We all have a dream

Black as night and brighter than the dawn
We will don our masks, and we are forced to carry on
We must find our way through this world
You will now feel afraid
In the war we will fight
And we must come out alive

[Chorus]

We will do whatever it takes
We must come out alive

[Chorus]
