Gold rush of religion, give the people God Cry out to
whatever name you choose For your convenience
Here's your quick served lie For your salvation There's
no way to lose A compromise to suit yourself But it
doesn't seem to fit too well Blind fear reaction earch
for inner peace No name religion, who is your god?
Feed the need to save our souls, whichever way we
please Pardon my sins, try to rid my guilty conscience
with ease Don't want to think, Generic mind Don't want
to search, Generic heart Don't want to see, Generic
view Just want my fix, Generic god Have you really
found peace? Wide is the road to destruction Narrow
the path to life Salvation has been given through one
name The name of Jesus Christ Eager for redemption,
don't want to be responsible Try to live the truth, just
don't hold me accountable Only one can mediate,
between God and man Only through His hell can we
obtain heaven The Way, the Truth, the Life There's no
other way to God
