Where's the melody, where's the melody  
Did it fade away, like your love for me  
The melody of love that's what I'm speaking of  
Now there's no melody, there's only you and me.

Where's the melody, where's the melody  
We say words of love, but there's no heart in me  
You know I remember when I heard violins  
Every time you'd be standing close to me.

Your still close to me yet so far away  
Your not loving me like you did yesterday  
I know there's something missing  
Cause I can feel it when we're kissing  
It's not the way it use to be  
Where's the melody, where's the melody  
I heard the music stop when you stopped loving me.

And now my heart don't sing, now the bell don't ring  
And where's the melody that sang for you and me  
Where's the melody, where's the melody  
I wanna hear it one more time  
Just played for you and me  
Where's the melody, where's the melody  
I wanna hear it one time for you and me...
