When I arrive
The dance floor comes alive
And the pulse takes to my mind
Through spectra lights I see you

When I arrive
The dance floor comes alive
And the pulse takes to my mind
Through spectra lights I see you moving

Shake the ground
Drown the night
Align for stars to shine
Take a ride, electrified

Don't sweat the disco
(Don't sweat the discotheque)
Don't sweat the disco
(Don't sweat the discotheque)

I know you
Crush me
Crush me
Rushing to my heartbeat
Don't be scared
Your hips will take you there
If you could
Just free
Just breathe
The air out of your lungs please
It's only gravity
Stay next to me girl

When we collide
Send chills down your spine
When your beat's in sync with mine
Through midnight eyes I see you moving
Hype the dream
Dream the hype
Breathe it all inside
Take a ride, electrified

Don't sweat the disco
(Don't sweat the discotheque)
Don't sweat the disco
(Don't sweat the discotheque)

I know you
Crush me
Crush me
Rushing to my heartbeat
Don't be scared
Your hips will take you there
If you could
Just free
Just breathe
The air out of your lungs please
It's only gravity
Stay next to me girl

She's got something over me
Too lost to see when
She's got something over me
Too lost to see when

I know you
Crush me
Crush me
Rushing to my heartbeat
Don't be scared
Your hips will take you there
If you could
Just free
Just breathe
The air out of your lungs please
I know you
Crush me
Crush me
Rushing to my heartbeat
Don't be scared
Your hips will take you there
If you could
Just free
Just breathe
The air out of your lungs please
It's only gravity
Stay next to me girl
