It used to be fun was in The capture and kill In another  
place and time I told you at the start I did it all for thrills  
I had no idea that you Love me and I'll leave you And  
you're the one to blame Would tear my world apart I  
used to know my name 'Cause even though I set the  
rules But I've lost control of the game You've got me  
acting like a fool When I see you I lose my cool Lust to  
love Was the last thing I was dreaming of And now all I  
want is just to love Lust turned to love That was when  
the fun was in I did it all for thrills The capture and the  
kill In another place and time Love me and I'll leave you  
I told you at the start Would tear my world apart I had  
no idea that you
