I haven't been your king, I promised I would be  
Liar, puppet  
Addiction fill the free, Free realm I used to be  
Sick, Diseased  
Am I helpless to the fate of this world?  
Has color or belief separated us? Separation... from our  
neighbors  
The secrets you try to hide ore revealed time and time  
again  
We reap the day, Can't go back home  
We scavenge graves, Off to hell we go  
I never thought it would come to this  
Bare witness to the destructive power of man  
Why has it come to this?  
Rules broken and changed to satisfy  
We reap the day, Can't go back home  
We scavenge graves, Off to hell we go  
(Solo: Doc)  
(Lead: Dallas)  
All together we stand and rise, or there will be blood  
Opposition set around me, Illusion of equality. Liberty,  
a far cry  
All together we stand and rise, or there will be blood  
Opposition set around me. Illusion of equality. Liberty,  
a far cry  
Sick. Diseased  
(Solo: Doc, Kris Norris)  
We are born of conviction. Reality is my muse  
Become the meditation. The tragedy reveals the truth  
Scratching the surface. Looking for answers  
What do you see when you see me?  
The remains of a world in rage, and the gaze of a dead  
eye  
All together we stand and rise. All together we stand  
and rise  
All together we stand and rise. All together we stand  
and rise.
