Morals

So undefined

New schemes

To undermine

He likes

To leave a burn

So much for live and learn

My saviour

And his low behavior

Someday

Everybody owes me a favor

If the look on my face

Is any indication

I keep giving in

To temptation

He creates

A false pretense

That it

Was self defense

He just

Can't mask the flavor

My saviour

And his low behavior

My saviour

And his low behavior

Someday

Everybody owes me a favor

If the look on my face

Is any indication

I keep giving in

To temptation
