

God-des And She "Lick It"

Visit "[Lick It](#)" on MotoLyrics.com

Good evening class
I'd like to welcome you to pussy eating 101
pay close attention now

Lick it you better lick it right touch it better touch it right
kiss it better kiss it right do that pussy right

There's Rules and regulations to pleasing a girl
going down town could really rock her world
but you gotta make sure that you know what you're doing
There's a map down there that you gotta start learnin'
first you gotta make sure you rehearse
move round your tongue like you're tryin' to curse
cause there's nothing worse than a tongue that
doesn't work
then your girl will be mad and you feel like a jerk
spread out her lips before you kiss
you wanna make sure that you find the clit
lick a little bit then move it all around
lick it all over till you hear her make a sound
then you know that you find a good spot
teas it a and touch it but not a lot
with your mouth down south you're in control
you could make it happen fast or slow

Lick it you better lick it right touch it better touch it right
kiss it better kiss it right do that pussy right
Lick it you better lick it right touch it better touch it right
kiss it better kiss it right do that pussy right

Don't be bland better act creative
be on top of your game and be innovative
experiment a bit then change it up
lick a little lower then put it in her butt
then you can place a finger inside
make sure that it's wet and easy to glide
when she's really wet and your fingers slide
try to put another one inside
but you better still have your mouth on her clit
you know you're doing good if her legs twitch
then pick her up and set her on your face
pick a large area to give her some space

she needs some room to place your mouth where she
want it
let her ride your face like she's about to come on it
the key to a girls heart is going down south
so come on everybody let her put it in your mouth

Lick it you better lick it right, touch it better touch it
right,
kiss it better kiss it right do that pussy right
Lick it you better lick it right, touch it better touch it
right
kiss it better kiss it right do that pussy right

Let your mouth do the talkin and your tongue do the
walkin
work on your cardio there is no stopin
Get through the pain if your jaw locks
you gotta be a soldier and don't stop
lick her and finger her at the same time
feel around the G spot seek and you shall find
rub on the spot lick on top
gotta be coordinated show her what you got
so once you got that down put your other hand around
I have to be blunt and not profound
put your wet pinky finger in her asshole
your in three different place its time to go
your pinky in her ass your other in her hole
your tongue move fast like a drum role
if your girl can't cum this way
I guess she's not ready come back another day

Lick it you better lick it right ,touch it better touch it
right
kiss it better kiss it right do that pussy right
Lick it you better lick it right ,touch it better touch it
right
kiss it better kiss it right do that pussy right
Lick it you better lick it right ,touch it better touch it
right
kiss it better kiss it right do that pussy right
Lick it you better lick it right, touch it better touch it
right
kiss it better kiss it right do that pussy right
