I'm tired, I'm scared and I'm lonely

I haven't slept for several days

I'm looking for attention

I need to change my ways

As daylight turns into evening

I'll wait for morning to come

I've seen my own reflection

While waiting for the sun

I'm down, I'm flatbroke and I'm busted

I guess I need some money too

I want somebody to depend on

Someone who feels the way I do

As daylight turns into evening

I'll wait for morning to come

I've seen my own reflection

While waiting for the sun

So help me now, help me now, help me now

Help me now, help me now, help me now

I'm in need of some distraction

I could use some company

I need somebody to depend on

I do believe that you're the one
As daylight turns into evening
I'll wait for morning to come
I've seen my own reflection
While waiting for the sun
So help me now, help me now, help me now
Help me now, help me now, help me now
So help me now, help me now, help me now
Help me now, help me now, help me now
Help me now, help me now, help me now
