When I saw her on the corner

I should've told her that I loved her

Instead we talked about the weather

Agreed to meet another time

Then slowly seven days passed

And I wished that I could kiss her

My heart it's moving like a yo-yo

And it spins in different times

Colours fly and I don't hear no sounds

'Cause it feels like I'm spinning round and round

And round around

She started walking straight towards me

And said her given name was Jo Jo

Her lips they burnt me just like fire

I put my heart right on the line

Colours fly and I don't hear no sounds

'Cause it feels like I'm spinning round and round

And round around

Everything I want I can see in you

And I want you so bad

Everything I want I can see in you

So let me trip on you

Oh yeah

Everything I want I can see in you

And I want you so bad

Everything I want I can see in you

So let me trip on you

Now everything is hunky dory

And there's a reason and a rhyme

And that's the moral of this story

Me and Jo Jo's doing fine

Colours fly and I don't hear no sounds

'Cause it feels like I'm spinning round and round

And round around

Everything I want I can see in you

And I want you so bad

Everything I want I can see in you
