I'm in a war against the truth

I'm being shot right next to you

I wish that we were going somewhere

I wish that I was more like you

I wish that you were less like me

'Cause I believe we're really nowhere

See the world on fire it's burning

It's turning upside down

See the world on fire it's burning

It's turning upside down

And if I could I'd change the world

For every boy and every girl

We can't wait until tomorrow

The time has come for us to choose

And we have nothing left to lose

But pain and ignorance and sorrow

See the world on fire it's burning

It's turning upside down

See the world on fire it's burning

It's turning upside down

See the world on fire it's burning

It's turning upside down  
See the world on fire it's burning  
It's turning upside down  
See the world on fire it's burning  
It's turning upside down  
And in the war against the truth  
I make my stand right next to you  
We need to know we're going somewhere  
Stars will fall down from the sky  
This world belongs to you and I  
We can't go down this road forever  
See the world on fire it's burning  
It's turning upside down  
See the world on fire it's burning  
It's turning upside down  
See the world on fire it's burning  
It's turning upside down  
See the world on fire it's burning  
It's turning upside down
