World of chaos for us to bear  
Fall of mankind all life shall end  
World in terror  
No salvation - united we fade  
Death's the curse of man to wither and die  
Darkness swarms around us with a blessing from hell  
Day by day we blindly fight and no one shall rise  
A great becoming the final end of human race

End of days - coming the storm  
Challenging mankind - in a violent form

Demise of man, earth and all existence  
In a dark funeral

Lies, and madness now damn us all  
Kill for pleasure, another death  
Another war to save the day, obey (and) fall prey  
We feel what is to come No species will be spared
