"Holy And Bright"

Visit "[Holy And Bright](#)" on MotoLyrics.com

A new star's shining on an ancient story
That can take your mind to new horizons
Where laughter and adventure crosses borders
Of time and place to love and wisdom
You'll find roads into your imagination
That can stretch and open far and forever
(You'll) See colors transcending even rainbows
We have so much we can discover
There's a star that's shining through the darkness
(Shining holy and bright)
So follow that star that can guide us now
(Oh so holy and bright)
Lighting childlike purity
In the dusty corners of our mind
(*) Holy, holy and bright
A star is shining so holy and bright
Holy, holy and bright
Never let it go out of your sight
---chorus part---
(Gold and silver, star of wonder
Ah-holy and bright
Gold and silver, star of wonder
Ah-out of your sight)
Repeat from the beginning
* repeat and Fade out
