Can you feel me now?  
There is no way out  
Can you tell what's on my mind?

I control you now  
You can feel my power  
Lick my wounds they'll set you free

I will take you now  
Where your mind will sour  
You can rest your head  
Take my peace instead

There's no pain in here  
There's no death to fear

Lick my wounds they'll bring you here

I will take you now  
Where your mind will sour  
You can eat your head  
Take my pain instead

Come inside, take the ride, losing time  
All is well, in my hell, take your life  
Watch my hand, destroy man, and your world  
Come with me, you will see, the end is yours
