Come in, come in, Air Force One
Come in, come in, One
Come in, come in, Air Force One

Come in, come in, One
Come in, come in
There's a bomb on board
There's a bomb on board

All you people
On that plane
Take your last sip
Of champagne
Then blow away
All you people
On that plane
Where you gonna land

You can't land on Venus
You can't land on Mars
You can't in Texas
There's no breathable air

All the breathable air
Has gone away
G one away

All you people
On that plane
Where you gonna land

Flying through the night
To save the world
The wings of power thunder
Lonely are the brave
On Air Force One
And later after dinner
They will close their eyes
And watch the stars go out
From Air Force One
