You have the power to heal yourself

All illness can be healed  
The cell regenerates  
Disambiguated situation  
There is a secret code  
In the structure of the mind  
You have the power to heal yourself

Flesh bodies mute and blinded  
Roaming uncertain, lost  
Infected misinformed  
Releasing a black enormous insect  
Out from the chest  
Archaic form disease

Esoteric surgery a dissection of the soul  
Unsuspected precise power  
On the wounded astral body  
Projected beam of light

All illness can be healed  
The cell regenerates  
Disambiguated situation  
There is a secret code  
In the structure of the mind  
You have the power to heal yourself

Suspended floating in empty spaces  
Descending swift like a fire running down  
Obstruction disintegration life force  
Overcoming all circumstances  
Release the pain
