Thought you saw this last time
It's a rerun
But this time it's changed you
You said you never watched it
Oh, it's your free time

Image passed, forget your words
You live it, you live it everyday
Dead end stare, eyes transfixed
Focused on destruction, destruction of yourself

This could be, this could be
I wait for you, I wait for

Take a while, things only you can change
As you relieve, as you relieve
Stay awhile, things only you can change
As you revive, as you revive yourself, yourself

This is the last [Incomprehensible] with you
It's the last [Incomprehensible]
[Incomprehensible]

Take a while, things only you can change
As you relieve, as you relieve
Stay awhile, things only you can change
As you revive, as you revive yourself, yourself
