"Northern Lights"

Visit "[Northern Lights](#)" on MotoLyrics.com

Stones like these are just like fuel underground
You stop my feet from floating up
when I come down
I go up and watch the world spinning round
But I came down

You can't see that I'm like dust on the ground
The wind picks up and then it blows me around
I go up and watch the world spinning round
But I came down

Finding out the northern lights
Flicked up a single switch called rocket
Finding out the northern lights
Flicked up a single switch called rocket
Finding out the northern lights
The northern lights

Stones like these are just like fuel underground
You stop my feet from floating up
when I come down
I go up and watch the world spinning round
But I came down

Finding out the northern lights
Flicked up a single switch called rocket
Finding out the northern lights
Flicked up a single switch called rocket
Finding out the northern lights
The northern lights
