I'm gonna bring you down my baby I'm gonna bring you down

You're flyin' high up in the sky but I'm gonna bring you down

Your'd scattered parts of broken hearts all over this old town

You had your day but now you'll pay cause I'm gonna bring you down

You fooled around with other girls while I sat home and cried

You had those back street love affairs and then came home and lied

You took the smile I used to wear and turned it to a frown

You broke my heart the very last time and I'm gonna bring you down

I'm gonna bring you down my baby...

[ac.guitar]

I'm gonna bring you down my baby...
