(It's a lovely lovely world since I met you)
Mother nature's opened up the door to lots of things I
never saw before
It's a lovely lovely world since I met you
Never did see everything looking so nice I just learned
the meaning of paradise
It's a lovely lovely world since I met you
Now the sun shines brighter and the sky is a little bit
bluer
And my little old rattle trap Ford Coupe even seems a
little bit newer
Well my guitar stays a better in tune
The stars shine brighter there's honey on the moon
It's a lovely lovely world since I met you
[ac.guitar]
Ever since you cuddled in my embrace I've had more
fate in the human race
It's a lovely lovely world since I met you
Now I don't mind working or slaving all day I know
tonight there'll be love to pay

It's a lovely lovely world since I met you
Everything seems real so right since the day I found
you
Everything looks rosy and shiny bright in the dreams
I'm building around you
Used to think that miracles would never come true
But now I'm happy cause I know they do
It's a lovely lovely world since I met you
It's a lovely lovely world since I met you
