

Goldie Lookin' Chain "Professor Doppelganger"

Visit "[Professor Doppelganger](#)" on MotoLyrics.com

My name is professor doppelganger and i am here to unlock the secrets of your mind, to discover why you really are the psychotic trauma case that we have been told you are by the authorities, you will lie down on the couch and listen to my voice, i will count down from ten,

On one you will be asleep, ten.....nine.....eight.....you are feeling drowsy.....seven.....six.....you are falling into a deep, erotic sleep.....five.....four.....your eyes are becoming heavier and heavier.....you are getting closer.....two.....one.....you are asleep

Your self conscious mind is opening up to the power of my suggestion, you are feeling completely relaxed, listen to my voice, i will guide you, tell me of the first time you committed an atrocity? what was the turning point? when did you realize you were different from the other boys?

What does it mean, at the age of thirteen

To stuff the kids next door in the washing machine?

Switch it to spin, stand back and laugh

Then hang 'em by their nuts from a telegraph-pole, german, swedish, french and dutch too

The voices have been calling me eggsie since '82

It's not my fault, i can't be to blame

It's the voices in my head calling out my fukin' name

You claim to be the embodiment of several different personas, each one seemingly more confusing and profound, search within your mind, who am i talking to now?

Hi, rennie-la-lou, a new member of the crew,

On the doctors couch for all the bad things that i do

You mighta heard it on the south west news

Busted by the police for shagging monkeys in the zoos

On the TV, but i walked away free

On the grounds of being mental since the age of three

You also talk of another character called Chon Ben Wa Balls

Fuk you, searchin' my past

If you step to me, the next breath is your last

You wanna hypnotize, get behind my eyes

If you delve any further then you're in for a surprise

I like doing things that cause pain and distress

Alone in the house, i'll make your mother undress
You'll never break me or take me alive
You got more chance of fukin' Princess Di
After intensive hypnotic regression i have reached no
solid conclusion, doctor gob-shite, you hold the destiny
of the test subject in your hand, what is your opinion?
are they to be punished?
Mmm, let me ponder and let me think
These boys, they like to smoke and they like to fight
and drink
Their depravity defies the very gravity
Of the the situation in which their minds revolve or so i
think
Well doc, what's the prognosis?
They said they'd find a cure if i went and did hypnosis
They find the root of my fukin' psychosis
Make me realize that my cause was hopeless
I fall asleep and questions they ask
Like, 'let's take it back, back to your past'
I see the faces of the people i've known
It's like something out the fukin' twilight zone
Then i feel it, it starts to come near
The root of all my evil - draw, fags and beer
We are beginning to break into the un-subconciuous
mind to find out the real truth behind the goldie lookin'
chain
GLC.....GLC.....GLC.....GLC.....
