Ice under your feet starts to break
it held together my last faith
and with every false thought you make
we get ready for the requiem

theres no hope. theres just sin
a struggle we are enclosed within

this world is falling straight down
the sun burns in your skin
you doubt my loyalty.
i doubt your dignity.
we are even now.

you will pay for my loss
you will pay for every suffer
you will pay the fucking cost
you will pay the fucking cost

integrity!

integ!
