Bigshot loser, movie star
Think you're something special cause we know who you
are
Smalltime loser, I guarantee
You made your big connection from down upon your
knees

And you know now
How it goes down

Backseat lover, beauty queen
Girl you seem so good even your garbage is clean
Backseat lover, you're overexposed
it happened under covers but now everyone knows

And you know now
How it goes down

Turn it up now, live it out loud,
Never back down, never background your life story
Up now like a storm cloud
Livin highbrow, got your cash cow your life story

Up now like a showdown
Never knew how but you know now how to get low down
Your life story

(break)
Bitch slap beatdown on your beatup guitar
Playin on the corner for some change in your jar
Bear your soul, you took your abuse
You can only win cause you've got nothin to lose

Turn it up now, live it out loud,
Never back down, never background your life story
Up now like a storm cloud
Livin highbrow, got your cash cow your life story
Up now like a showdown
Never knew how but you know now how to get low down
Your life story
