People, yes, what do you see
They don't even know how we feel
Oh so many times I feel like passing by
Oh you know I'm living a lie

But when you see me
Please don't ignore me
This feeling that I have deep inside
Just cannot be denied

The way you rock me
The way that you roll me, woman
Just cannot be described
Why sympathize with me

Don't you ever lie to me
Don't you play with the way that I feel

But she's my lady
My whole special lady
She, she make my feeling so real
Oh so very real

So now you know how my life goes
Now you've gone away I'm living a lie
Now you can see
Just how much you meant to me
And you know why I'm living a lie
