First things first let me get it out
No and don't stop me, let me get it out
I've got a few things on my mind
First thing that comes to mind
How we keep losing time
I can not decide if it's wrong, or right but

I hope that you find peace
I know you'll think of me
I've gotta smile while I'm wondering
If loving energy's all we need

Before long it comes to light
How we keep passing by
We long for better days
And for all to be right so

I hope that you find peace
I know you'll think of me
I've gotta smile while I'm wondering
If loving energy's all we need

No matter how time goes
No matter cause, you know
Part of me will always love
No matter how time goes
No matter cause, you know
Part of me will always be with you, with you now

I hope that you find peace
I know you'll think of me
I've gotta smile while I'm wondering
If loving energy's all we need

I'm holding on to love
