

Good Charlotte "Cardiology"

Visit "[Cardiology](#)" on MotoLyrics.com

your heart is a vessel that can carry you far away
further than you ever gone before

it could swallow an ocean in the palm of your hand
but only if you open up that door

Chorus:
cardiology is guiding you and me
through ancient history
a new technology
cardiology is a mystery

is there a formula that could possibly explain
what can feel so good and bring you so much pain

science is no help when we reach the day
we face the truth that love can slip away

Chorus:
cardiology is guiding you and me
through ancient history
a new technology
cardiology is a mystery

Bridge:
take apart this heart tell me where to start
no book that i can find has the answer
medicine can't cure the fact that i'm still yours
even though you've gone on without me

Chorus:
cardiology is guiding you and me
through ancient history
a new technology
cardiology is a mystery
