[Originally by Vroom]

I think I've seen every star in the sky tonight
removed from the city lights
has never seemed so bright
I know I shouldn't believe a word you say
I do anyway
'cause I'm dumb like that ohh,
and all the words I've given you
when you smiled I thought that it meant
something else
you were just being yourself
being nice
you're always rather polite to me

You let me down again
You ignored the things I said to you
If I was scared of you then
maybe I could leave
And if I walked away right now
there would be nothing left for me to lose
but doubt

Never fell so far for anyone before
never again, I swore
and with you hope was restored
make me feel like I've been torn apart
I don't like that at all
I lost control, ohhh
and all the words I've given you
I poured my heart out into an empty coffee cup
you drank it up
left me here to drown
Alone

You let me down again
You ignored the things I said to you
If I was scared of you then maybe I could leave
but if I walked away right now
there would be nothing left for me to lose
but I can't lose you
I can't lose you

I think I've seen every star that I care to see
but I don't wanna leave
It hurts when you are self deceived
I know I shouldn't believe a word you say
but I do anyway
'cause I'm dumb like that
And all the words I've given you
when you smiled I thought that it hurt
something else
you were just being yourslef
being nice
you're always rather polite to me

You let me down again
You ignored the things I've said to you
If I was scared of you then maybe I could leave
And if I walked away right now
there would be nothing left for me to lose
But doubt
But doubt
But doubt

There's nothing left for me to lose
There's nothing left for me to lose
for me to lose
but doubt

There's nothing left for me to lose
There's nothing left for me to lose
for me to lose
but doubt

There's nothing left for me to lose
There's nothing left for me to lose
for me to lose
but doubt
