I am marching across the ocean  
I won't fall, the ice is evaporating still

I'm just looking for shelter  
You're just holding my hand if I hold you  
You don't have to belong here  
We'll just know when it's right  
We'll just know when it's right  
When it's right

Oh girl you're already a picture of my will  
You're my girl  
Can we try to be here just for a while

I'm just looking for shelter  
You're just holding my hand if I hold you  
You don't have to belong here  
We'll just know when it's right  
We'll just know when it's right  
When it's right

Break the ocean in two and I'll know what to do  
Bring me closer to you and I'll know what to do

I'm just looking for shelter  
You're just holding my hand if I hold you  
You don't have to belong here  
We'll just know when it's right  
We'll just know when it's right  
We'll just know when it's right
