The foetus silent screams  
Sobers the tenour  
The pleasure in his brain  
The smell of his ritual  
Mucous purulent  
Insatiable intent  
Effects of virus  
On embryonic development  
Endosymbiotic infection  
Carrion state suppuration  
Persists inapparent  
Equilibrium between  
Lesogeny activated

When the cells started  
Adding new virus infections  
Uncontrolled proliferation of humans  
The foetal disease process  
Development has began...  
Disbury with contaminated corpse  
Cryptic mutants  
Your mind rot  
Your pleasure, bizarre  
Sexual butcher insatiable  
Premature necrofoetisexism
