"Sickening Surgery"

An induction to sexual disorders,
Cold premeditate sickening surgery
Altered brain cells inception, tools of abuse
Endemic seeds grow... to the core.
Discordant pathologies,
Sharpened rusty razor caresses the intestinal areas,
then cut them violently... deeply.
Internal corruption,
Overloaded excess of hepatic treatment.
Mutilation - rip and cut.
Decortication - surgically slain.
Exsanguinating - straight from the heart's veins.
Lethal injections,
Abhorrence.
Carved to the bone,
Guts come filled with rot and disarray.
Skin tissues proceed to the dislimbing process,
Consumed and inhumed.
