Just falling out  
Not making much of anything at all  
But all you could hide  
From what's there in the past of it

Just falling out  
Not making much of anything at all  
But all you could hide  
From what's there in the past of it

Just falling out  
All you can't hide  
All you can't hide

Just falling out  
All you can't hide  
Hongkongaton

All you can't hide  
Just falling out  
(Not making much of anything at all but)  
All you can't hide  
(From what's there in the past of it)

Just falling out  
(Not making much of anything at all but)  
All you can't hide  
(From what's there in the past of it)

Just falling out  
(Not making much of anything at all but)  
All you can't hide  
(From what's there in the past of it)

Not making much of anything at all but  
All you can't hide  
(From what's there in the past of it)  
All you can't hide
