### "Domino Effect"

Visit "[Domino Effect](#)" on [MotoLyrics.com](http://MotoLyrics.com)

I light a spark and you feed the flame  
The whole world's on fire  
I say a word, then you say the same  
Now we're all in the choir

And one thing's for sure  
Still ain't a cure  
To defeat the human chain

Truth is my friend  
It will never end  
And it's been like this before

The story goes on  
They fall one by one  
Trying to stand  
But the game's just begun

From the first one in line  
To the last in no time  
And it seems there's no way to reject  
The domino effect  
The domino effect

News travels fast, like words on the street  
We're tearing walls down  
So easy to affect, we tend to believe  
What might come around

And one thing's for sure  
Still ain't a cure  
And there's nothing you can do

Truth is my friend  
It will never end  
And it's been like this before

The story goes on  
They fall one by one  
Trying to stand  
But the game's just begun

From the first one in line  
To the last in no time  
And it seems there's no way to reject  
The domino effect  
The domino effect  
The domino effect

Truth is my friend  
It will never end  
And it's been like this before

The story goes on  
They fall one by one  
Trying to stand  
But the game's just begun

From the first one in line  
To the last in no time  
And it seems there's no way to reject  
The domino effect

The domino effect  
The domino effect  
The domino effect

The domino effect  
The domino effect  
The domino effect  
The domino effect
