Hurricane rollin'
speedin' over desert sand pedal to the metal, yeah
I'm doin' all I can hot wind blowin' in my face
n' I feel free when I'm drivin' on the dusty roads of no
man's land

Don't dare to stop me I won't get outa your way

Got a one way ticket
n' I don't care what they say got a one track mind
and I'm doin' it all my way had to learn the hard way
dreams are made of steel tomorrow never mind
'cause' I live just for the day

Don't dare to stop me now
or I blow you outa my way

Here comes the heat
like you never knew before
here comes the heat
burnin' down your door

I'm a Super Nova faster than the speed of light
move outa my way if you don't wanna start a fight
rockin' all over nothing you can do
comin' up for more the target in my sight

Don't dare to stop me now or I blow you outa my way

Here comes the heat
like you never knew before
here comes the heat
burnin' down your door
here comes the heat it's comin' more and more
here comes the heat
