Sister moon, come lead me down  
to rest my weary head  
I walked a million miles, along  
the road of no regret

I've been a fool, messed  
around...  
a lock without a key  
I'm waiting for the  
morning sun  
to make it shine on me

So long, lonely days  
take me back where i

belong  
All gone, it's all behind  
Hope you don't mind, hope you don't mind,  
hope you don't mind

too many times i lost the grip  
was worn out on the floor  
Fallen angel, don't lose your wings  
'cause' you'll never fly  
no more
