### "Like Flies"

We're at a place in history where the bar is at an all  
time low  
We've applauded mediocrity till there is no lower we  
can go  
Art has no place in this world of supersize  
Follow the leader to the latest pile of shit  
Like flies

And those who peddle it sold their own souls long ago  
They would not know the difference between Vin Diesel  
and Van Gogh  
They stare at me with envy with their big green  
bugging eyes  
Spreading filth, buzzing all around my head  
Like flies  
Like flies

Feast or famine, peace or war - life will get you in the  
end  
Sex, drugs, powerlines and vaccinations - something's  
going to do you in  
There ain't no way of stopping death when it's time for  
your demise  
All my heroes and friends are dropping  
Like flies  
Like flies
