(Lawrence Gowan/Eddie Schwartz)
With urgent hands
We excited
A fire so hot
Two lives were ignited
Now I'm left here on my own
But I'll never be alone
Down forbidden streets I talk with
Every single step I walk with
All the lovers in the world (all the lovers in the world)
Though the lonely night's returning
I can feel the flame that's burning
All the lovers in the world
Virgin lips I have tasted
Love so pure, not a drop was wasted
Paradise we shared together
Lives inside of me forever
Down forbidden streets I talk with
Every single step I walk with
All the lovers in the world (all the lovers in the world)
Though the lonely night's returning
I can feel the flame that's burning
All the lovers in the world (all the lovers in the world)
Since you touched me
I can't be free
This is every lover's destiny
Down forbidden streets I talk with
Every single step I walk with
All the lovers in the world (all the lovers in the world)
Though the lonely night's returning
I can feel the flame that's burning
All the lovers in the world (all the lovers in the world)
Down forbidden streets I talk with
Every single step I walk with
All the lovers in the world (all the lovers in the world)
