

## Government Warning "Fat Nation"

Visit "[Fat Nation](#)" on MotoLyrics.com

Burger king and taco bell  
addicted to the shit they sell  
gargling their fat and grease  
you're countin' carbs but you're still obese

exercise? no fuckin' way  
you'd rather just fucking pay and pay  
easy ways out, quick relief  
but being fat is not a fucking disease

all across the world they thunk were crazy  
man they say america is just fat and lazy  
maybe they're right  
maybe concrete jungles look like urban tombs

maybe its true, and were all fucking doomed

twinkies and cathode rays  
the latest work free fitness craze  
comatose motherfuckers too lazy for life  
but low cal , low carb thats no way to survive

welcome to the red white and blue  
were all fat and lazy and you could be too  
welcome to the red white and blue  
where half of us rely on fast food
