Angel of night from the other side of daylight  
Burning like a candle till the morning light

Angel of the night blinded by the morning light  
Slipping into darkness like a thief in the night

Riding 'cross the ages filling empty pages with your  
song  
On a flaming stallion halted by the guardians of the  
dawn

Angel of the night angel of the night  
Angel of the night angel of the night  
Angel of the night angel of the night

Angel of the night from the other side of daylight  
Prisoned like an outlaw on the edge of night  
Angel of the night the keeper of the neon light  
Draws her to the spotlight while the moon burns bright

Maybe I will love you while the world is sleeping  
I will hold you tight  
Till echoes from above you call you into darkness  
with the morning light

Angel of the night angel of the night  
Angel of the night angel of the night  
Angel of the night angel of the night
