"Illustrate And Design Parameters"

Visit "[Illustrate And Design Parameters](#)" on MotoLyrics.com

I'm a student of the obvious
I've got the equipment to magnify
I've got the angle to focus on the scope

Can you visualize?
Are you mesmerized by the conclusion of molecule?
Composite performance
I've got the angle to focus on the scope

Round them up
And build [Incomprehensible] and build empire
From compound to component
And build empire
From compound to component

From compound to component
Build, build
From compound to component
Build, build

And build empire
From compound to component
And build empire
From compound to component
And build
