Leaving me here  
I want you to know that  
I wanted you there, you were the best thing in my life  
Somehow I know someone is on the other side  
You're turning me over, letting you look on deep inside

Cellaphane girl, playing a part in a cellaphane world  
Cellaphane girl, see through me, see through me

Hello there girl, you leave a sweet taste in my mouth  
On the edge of the world  
She'd rather jump than just look down  
Taking me under, you're leaving me dry  
We're coming up w/ lies and lies, and lies and

Cellaphane girl, playing a part in a cellaphane world  
Cellaphane girl, see through me, see through me  
See through me, see through me

Leaving me here, I want you to know that  
I wanted you there, you were the best thing in my life  
Somehow I know someone is on the other side  
You're turning me over, I'm letting you look deep inside

Cellaphane girl, playing a part in a cellaphane world  
Cellaphane girl, see through me, see through me  
See through me, see through me
