There's a man in my suitcase, a woman in your clothes  
Skeletons inside us that dance on hot coals  
Cannibals are outside following our trail  
All our information comes from junk mail

Don't leave it among us, don't let it loose in the crowd  
Don't let it reign over us, cos that was yesterday's  
cloud  
Still hanging over us

There's an elephant of memory, a monkey on a back  
A poisonous whirlpool, swirling and black  
I know we have tasted the forbidden ugly fruit  
Get it out of our system rip it by the root

Chorus repeat

The rain came out of nowhere, a bad flashback  
Someone hit the switch and the sky turned black  
Why is this happening, why won't it go away?  
If this is a game I don't wann play

Chorus repeat
