They say he's lost his good song  
They say he's itching with a gun  
So you can drop your bombs  
On everything in sight  
Cause he couldn't care less  
If this while world should collide  
Corssfire and hurricanes  
Familliar faces forgotten names  
Nothing stays the same  
You know that nothing ever could

This used to be our playground  
Will something better come this way  
This used to be our playground  
I want to be ready for today

Move fast and step out of the light  
Come into this sleepless moonless night  
See the man as he falls on to the ground  
With all the words in his hand  
They just won't make a sound

This used to be our playground  
Will something better come this way  
This used to be our playground  
I want to be ready for today

Take what's left  
Take what's left  
Take what's left of this pride  
And push it away  
Make sure that you're leaving tonight  
Cause you're out here on your own

This used to be our playground  
Will something better come this way  
This used to be our playground  
I want to be ready for today
