

The Accident Experiment

"Lost Kisses"

Visit "[Lost Kisses](#)" on MotoLyrics.com

After all this time
With nothing left to say
Here inside my mind,
You're beautiful the same

And I asked the stars at night
And satellites to send a message to you
That I'm still far away holding sunny days
And lost kisses meant for you

When fear has crossed the line
And holds me on her grave
You give me wings to fly above the universe
And breathe another day

Sometimes I cry for you
Inside I fall into you
Sometimes I fly with you
Inside I die for you
