One...  
Two...  
Three...  
Four...  
Tamn the tones  
And test the tones  
That pre-amp does  
Impass the lomes  
Continuing the input please  
Dial in the gates release  
Reverse phase and reverb plates  
Will give the instrument some space  
Earphone monitor fatigue  
Green compression from Jonique  
I sound as though I know my stuff  
And sure I guess I know enough  
But I'm just a dork  
And can't really record  
I'm sorry I won't say no more  
Except for  
I don't want to record anymore
