[Grym Reaper]

I want a queen on every continent
So I can escape the government
Flee my residence, settle in
I'm militant minded, brilliant rhyme whiz
The time is now for me to shine, kids are innocent
Blinded, society got to be reminded of my diary
Cause tragically I carry thee
Misery of centuries that's sent to me
Not coincidentally intentionally cause mentally I
represent the key
But it's a double-edged sword see
Tryin to be godly is hard
Especially in poverty's backyard
Where violence has taken over
Free enterprise and lies is idolized
Cause it's deep inside with Allah, God or Jehovah
To guide the lost tribe
You're forced to reside on the north side
Babylon is never penalized
For bein offside, so many lost lives
I wonder how long before the herd dies
Today I heard the earth cry for the first time
It was the worst time
It was the worst time
The way I heard the earth cry

[Rzarector]

I came to the shores of America disguised as a pillar
The alpha and omega and the home of the beggars,
the black sellers
Who been beaten, raped, lynched, robbed and stoned
And caused to roam the earth in service cause they
couldn't maintain at
home
This dates back to 1555
When they captured the first tribe of men
And piled them in a pen
Fifty feet high
They took em all on a 9000 mile ride
And landed on the shore of a place they never seen

before
But read about this inside the ancient books of war
Bonded in stainless steel, stripped of their language
Still survived the anguish of slavery but still remained
nameless
Separated to portions and tricked by John Haughty
Hawkins
And sold on the auction, taught birth control and
abortion
Rulers of the first part became slaves of the worst part
The devils cursed God and reversed God
And turned God into dog and made people search
hard
No relief came to the prophet of W.D. Feraud
To a trauma, dropped our mommas off in Bahamas
and Barbados
Tobagos, separated us from slave boats
Made our own brothers hate us
From Virgin Isle to Jamaica
Trinidad, Honduras, Haiti, Grenada
Bermuda to Cayman, mental enslavement
You black gods become awaken

At night time you can hear the earth cry
How many more black gods got to die
Before we realize there's no God in the sky
The devil tricked us, that's the worst lie
At night time I can hear the earth cry
How many more black gods got to die
You realize there's no God in the sky
The devils tricked us, that's the worst lie

[Gatekeeper]
Peace god for real, not a spook nor a ghost
Not unseen but seen and heard most of all
I'm god, control nine planets
Wisdom revolves around me understand it
Science, huh my rhyme's underrated
Pyramids built accordin to how we made it to be
Many shall come few shall be chosen
32 degrees below zero and you're frozen
Power of refinement my rhyme's assignment
Is to crush negative bullshit in a line
With the fusion
Cause that which is beyond 360 degrees is an illusion
Either you're deaf, dumb or blind
Stupid hypocritical, dumb 85 yo it's time
See I without me don't exist
God cypher love devine is what I miss
Check it like a visual reflection, sorta supernatural
Your know your mind detects as bein natural

Ultra gammer, the hammer's my energy
Compressed to a form of a threat toward my enemy
Cypher's a circle that consists of a whole
No beginning no ends no sides it's just a hole
Like in an event I'm a percent
Dealt out a hundred I'm 5, my degree is a black belt
Real genuine not authentic
Older than the sun moon and stars unprecedented
In North America success can be won as a game
And knowledge and understanding still one and the
same
Greatest reward known to mankind
That winners never quit and quitters never win in the
mind
But in time my degrees are gettin deeper
Thicker in the subconscious state of the sleeper

At night time I can hear the earth cry
Wonder how many black gods got to die
At night time I can hear the earth cry
I wonder how many black gods must die
At night time I can hear the earth cry
I wonder how many black gods must die
At night time I can hear the earth cry
I hear her cry (Peace to the earth)
I cry
